

RPS v1.1 — Kindle Momentum

Polish the following text: "Refine the following text: "You are working longer hours than ever, yet your most critical projects remain unfinished at the end of every week. The modern workflow isn't just broken; it is actively working against your cognitive architecture. We must dismantle the reactive patterns that dominate your day and replace them with intentional friction points."

First, identify the single highest-value objective before opening your communication tools. Second, eliminate non-essential context switching by batching administrative overhead into isolated time blocks. Third, build structural safeguards that protect deep work state from external interruptions.

By enforcing these core boundaries, you transition from reactive busyness to deliberate execution. Stand firm on your focus, reject superficial urgency, and take total command of your output."

Respond in JSON: {"refined_text": "..."} Respond in JSON: {"refined_text": "..."}
The screenshot shows a chat window with a dark background. At the top, there's a header bar with a blue icon on the left and the text "GPT-4o" on the right. Below the header, there are two messages from "GPT-4o". The first message says "Respond in JSON: {"refined_text": "..."}" and the second message says "Respond in JSON: {"refined_text": "..."}". Both messages are enclosed in light gray rounded rectangles.
